1. In June the Tsingtao Naval Command conducted an overall inspection of anti-aircraft defense installations, both inside and outside of Tsingtao city limits. All such installations which were considered improperly built were to be completely reconditioned before July 1952.
2. On 10 June a consignment of arms was brought to Tsingtao from Tientsin. Included in the consignment were 20 Soviet-made radar-controlled anti-aircraft guns to strengthen the air defense of Tsingtao. These have been installed at various points along the coast and at Ts'angk'ou (120-24, 36-12) Airfield.
3. Since the summer of 1951 the salt fields in the Liuchiakou (120-54, 37-45) and Shao-sungying (4801/1345/3602) areas of P'englai (120-45, 37-49) Hsien have been under government management. They are operated by the National Edible Salt Company of Shantung. At the beginning of June 1952 the Military District Command designated these salt fields as restricted areas. All the saltmaking installations were dismantled, more than one thousand workers were dismissed from their jobs, and defense works were built.
